OBJECTIVE - SEEKING SOFTWARE ENGINEERING INTERNSHIP

Exteremly driven to make a substantial impact in the world, creating technologies that endure the test of time. Acting to discover implementations of technologies to secure new market frontiers. Taking great care into the experience, quality, scalability, aesthetics where applicable, and utility of tools and products made.

Personal traits:

- Self-starter by nature, given leadership roles in competent fields
- Easily adaptable, able to pick up new skills quickly
- Excellent communication skills, written and verbal
- Strong work ethic, highly dependable
- Proven ability to work in high-intensity work environments

EXPERIENCE

SOFTWARE ENGINEER at Xircle • JUNE 2022 - CURRENT EMPLOYER

Development and marketing of Xircle app's Beta Launch. Developed full-stack features such as user matching, chat rooms, and hangouts using React-Native TS alongside AWS Amplify and DynamoDB. Enjoyed the insightful start-up sprint for product delivery, ensuring long-term scalability of business and app logic.

Accomplishments:

- Led marketing campaigns, rapidly gained a user base through connections to school clubs, and other affiliated organizations.
- Created full-stack app features such as friend matches, friend profiles, and hangout scheduler.

LEASING AGENT at CAREER STRATEGIES • MAY 2021 - OCT 2021

Managed apartment complex unit make-ready, prospect attainment, residents, maintenance, marketing surveys, as well as property tax and collection finances. Shift in management granted myself opportunities to adapt day-to-day events to better suit the needs of the property, as well as fortify community-company relationships.

Accomplishments:

- Worked as a temporary Property Manager for two months during the property's re-management.
- Raised property occupancy 73% to 92% within a month.
- Stabilized property weeks before refinance.

PHARMACY TECHNICIAN at WALGREENS • APRIL 2018 - AUGUST 2019

Responsibilities included prescription management, customer service, and stock handling all within a fast-paced environment. Managed database in order to properly handle customer insurance policies, requiring strong attention to detail.

Accomplishments:

- Promotion within the first month of hiring to Pharmacy Technician.
- Awarded Employee of the Month.

EDUCATION

SAN JOSE STATE UNIVERSITY • Computer Engineering - Graduating May, 2023

SEC Engineering in Computer Engineering which provided exposure to complex software and hardware engineering problems, and projects requiring collaboration and unique solutions.

.

LIVE OAK HIGH SCHOOL • High School Diploma, July 2019

- Honor roll graduate, 3.94 GPA. Founder of the schools e-sports club, in which I assessed and assigned roles based on the members level of skill. Team leader of the school's table tennis club.

PROFICENT SKILLS

Software Development:
Programming languages - JavaScript, Typescript, C, C++, HTML, CSS, Python, NodeJS

Frontend Frameworks - React, React Native

Back-end - AWS S3, DynamoDB, Amplify, SQL, GraphQL

Testing & Validation - Jest, Storybook

ML/AI - TensorFlow

WorkFlow/ DataModeling: Git, Hevo

CERIFICATES
JOHN HOPKINS UNIVERSITY • Coursera

Foundation web-design HTML, CSS, & JavaScript provided by John Hopkins University through Coursera's online platform. Certificate link: https://coursera.org/share/752ca5670ad50cd6bc7a4862fdcf7e6b

PROJECTS
ShopStop
Mobile app for renting out industrial & scientific equipment or shop space to the general public. Allowing individuals and small start-ups access to tools that would normally be out of their reach.
